

Villa de Los Barrios

Ayuntamiento

Este edificio ha tenido varias remodelaciones y ampliaciones sucesivas, de las cuales la más significativa se produjo en 1781, fecha en la que, según el proyecto del maestro alarife Juan de Vargas, se derribaron dos viviendas para levantar el nuevo edificio capitular, respetando al parecer la portada de piedra ya existente.

Luego hubo otras reparaciones a lo largo del siglo XIX, siendo totalmente derribado en 1966, a excepción de su elegante portada que por su interés artístico se integró en la nueva reedificación, concluida en 1968.

Con posterioridad ha habido otras remodelaciones hasta alcanzar la imagen que ahora observamos.

LOS BARRIOS TOWN HALL

This building has undergone a series of refurbishments and extensions since it was built. The major change took place in 1781 when two houses were pulled down to erect the new chapter house, in line with the project designed by the Master Builder Juan de Vargas. The already existing stone façade, however, seems to have been preserved.

Ayuntamiento de Los Barrios, principios siglo XX

Other repairs were carried out throughout the 19th century. In 1966 the whole building was demolished, leaving only the splendid façade which, because of its great artistic interest, was incorporated in the new building completed in 1968.

Since then, various other alterations have been carried out, leaving the building as we can see it today.
